BUREAU OF EMERGENCY MEDICAL SERVICES AND TRAUMA SYSTEM

JUNE 2013
YUMA COUNTY REPORT
ASTR 2011

Prepared by:
Maureen Brophy, MPH
Vatsal Chikani, MPH
Rogelio Martinez, MPH

Data and Quality Assurance

Purpose:

The purpose of this report is to describe the incidence of trauma in Yuma County using the Arizona State Trauma Registry (ASTR). This information can be used to assist in the development and strengthening of injury prevention programs at the county level.

Methods:

In 2011, the Arizona State Trauma Registry (ASTR) received data from 23 state-designated trauma centers. Four additional healthcare institutions participated in the registry but were not designated. The Arizona EMS and Trauma System has eight Level I trauma centers - six located in the central county of Maricopa with 60 percent of the state's population; the remaining two Level I trauma centers are respectively located in the northern-most county of Coconino and the southern county of Pima. For the 2011 reporting year, there were 15 designated Level IV trauma centers dispersed primarily in the rural areas of the state. There are a total of 29,877 records in the ASTR for 2011.

Limitations:

Data is limited to participating agencies in the state. Information on patients that are transported out of Arizona will be missed as well as those seen at hospitals that are not participating. Injuries included in this registry are those which fit the [ASTR inclusion criteria](#). As such, injuries reported are more severe injuries, and therefore not a complete picture of injury in Yuma County.

Geo-Population:

Arizona is 400 miles long and 310 miles wide for a total area of 114,006 square miles. The topography of the state is 364 square miles of water and a blend of deserts, mountains, and plateaus. Arizona shares contiguous borders with the states of California, Colorado, Nevada, New Mexico, and Utah. Internationally, the Mexican states of Sonora, Chihuahua, and Baja California Norte share a border with Arizona.

The total reported population in 2011 was 6,438,178; this was up from the 2010 reported number of 6,392,017 residents ¹. In 2011, 84.1 percent of the population lived in urban counties (Maricopa, Pima, Pinal, and Yuma). The remaining counties (Apache, Cochise, Coconino, Gila, Graham, Greenlee, La Paz, Mohave, Navajo, Santa Cruz, and Yavapai) were home to 15.9 percent of the population.

Additionally, Arizona has within its borders twenty-two (22) federally recognized American Indian tribes, comprising a 2011 collective population of 296,529, of which 162,119 (55 percent) reside on reservations and tribal lands.

Missing = 529

Statewide, there were 29,877 traumatic injuries seen at state designated trauma centers– a rate of 456 per 100,000 Arizona residents.

Yuma County makes up about three percent of the total population of Arizona. Injuries occurring in the county make up eight percent of the trauma cases from state designated trauma centers. The county-specific trauma rate, 1,172 per 100,000 county residents, is higher than the state average, and highest in the state (Figure 3).

FIGURE 3: County-specific trauma rates per 100,000 residents

FIGURE 4: Frequency and rate of trauma by age, race/ethnicity, and gender in Yuma County

Group		Count	Percent	Rate per 100,000
Age	<1	42	1.8%	1,395
	1-4	129	5.5%	1,045

	Asian Pacific Islander	*	*	*
	Other	40	1.7%	
Total		2,350	100%	1,172

*10 or fewer observations

The trauma rate in Yuma County is higher than the rest of the state for all age groups (Figure 5). The highest trauma rate in the county is among the 85+ age group (3,297 traumatic injuries per 100,000 county residents).

FIGURE 5: Trauma rate per 100,000 residents by age

FIGURE 6: Trauma rate per 100,000 residents by gender

Both males and females in Yuma County have higher trauma rates than their counterparts in other counties (Figure 6).

FIGURE 7: Trauma rate per 100,000 residents by race/ethnicity

The trauma rate for all race/ethnicities is higher in Yuma County than in other counties (Figure 7). The trauma rate is highest in people of White race/ethnicity.

FIGURE 8: Frequency of top causes of trauma in Yuma County

Cause	Count	Percent
Motor Vehicle Traffic	1,050	44.7%
Falls	676	28.8%
Transport, other	147	6.3%
Struck by/Against	145	6.2%
Pedal Cyclist, Other	87	3.7%
Other Trauma	245	10.4%
Total	2,350	100%

FIGURE 9: Top causes of trauma, rates per 100,000 residents

Figure 9 shows the top causes of traumatic injury in Yuma County, as compared with other counties (rates per 100,000).

FIGURE 10: Intention of trauma, rate per 100,000 residents

The rate of unintentional trauma is higher in Yuma County than in other Arizona counties (Figure 10).

Documented alcohol and drug use was present in 6.3% and 3.9% of traumatic injuries in Yuma County, respectively (Figure 11).

FIGURE 11: Substance use in traumatic injuries in Yuma County

FIGURE 12: Frequency of substance use in traumatic injuries in Yuma County

Substance Use		Frequency	Percent
Alcohol	No	2,203	93.7%
	Yes	147	6.3%
	Missing	0	0.0%
	Total	2,350	100%

FIGURE 13: Proportion of ground and air ambulance transports in Yuma County

FIGURE 14: Count of ground and air ambulance transports

	Air	Ground	Other	Missing
Yuma County	198	1,315	835	2
Other Counties	4,375	19,528	2,892	113

FIGURE 15: Golden hour by transport type

The term “golden hour” refers to the hour immediately following traumatic injury. Theoretically, the chance of survival is highest when medical treatment to prevent irreversible internal damage is obtained within this time period.

Due to the large amount of missing data on golden hour, results on the proportion of patients arriving at the hospital within one hour are not conclusive.

FIGURE 16: Count of golden hour by transport type to trauma center

Golden Hour	Air Ambulance		Ground Ambulance		Total	
	Count	Percent	Count	Percent	Count	Percent
<= 1 Hour	46	23.2%	476	36.2%	522	34.5%
> 1 Hour	47	23.7%	160	12.2%	207	13.7%
Missing	105	53.0%	679	51.6%	784	51.8%
Total	198	100%	1,315	100%	1,513	100%

FIGURE 17: Primary payer in Yuma County

FIGURE 18: Count of primary payer in Yuma County

Primary Payer	Frequency	Percent
Private-commercial/BCBS	897	38.2%
AHCCCS/Medicaid	615	26.2%
Medicare	284	12.1%
Self pay	150	6.4%
Other Government	136	5.8%
Other	62	2.6%
Workers Comp	20	0.9%
Not billed	7	0.3%
Missing	179	7.6%

Private-commercial/BCBS is the primary payment source for trauma-related hospital visits in Yuma County (Figures 17 & 18).

The median charge in Yuma County in 2011 was \$8,496 (Figure 19).

FIGURE 19: Charges & reimbursement by primary payer in Yuma County

Primary Payer	Total Charges	Median Charges	Total Reimbursements
Self pay	\$3,711,171	\$9,649	\$74,115
AHCCCS/Medicaid	\$10,899,154	\$6,758	\$1,593,165
